Guard Patrol/Time Track/Fix Assets using Android NFC Phone 1st System In The World **

的9703NFC的跟踪服务/保安巡逻系统是世界上第一款采用安卓手机会的NFC功能的系统

9703NFC Guard Patrol/Time Track/ Fixed Assets System

A-GTS(Guard Tour System)Offline/AGS(Active Guard System)Online Service tracking/guard patrol is the system using android mobile phone with NFC which launched in June 2012 , with GPS location we can prevent staff cheating time recording 100% comparing with other system available in the market now which just recording time and location only. This system can make online update database server at head office or in case house security owner of the house can access data through website and check online the status of the patrol. No need to waste time bring device to download data through computer and process for the report which is too late for any improvement for performance . In case use offline we can replace the old system and send data through email or download from computer but the difference is that the data has GPS Location for each record so it is impossible for staff to cheat time and place.

B-Offline use for assets tracking reading device by using NFC sticker recording the code and information of the assets with GPS location and send back by Email or download using computer

C-Offline/Online for sales or service staff that work outside can record time with Gps comparing with the sales or service report preventing cheating from staff and can export to Time Recording Software

D-Offline/Online for tracking time consumption for each department eg repairing car in color/engine/air condition department, how much time use for each department using WIFI

N9703NFC的跟踪服务/保安巡逻系统

离线/在线服务跟踪/保安巡逻系统是在2012年6月利用带有NFC功能的安卓智能手机会开发出来的,和目前市场上其他产品只是简单记录时间和地点相比,我们的产品能通过手机的NFC和GPS定位系统100%可以防止员工在时间记录上作弊。

该系统可以通过总部在线更新数据库或者如果雇主主要检查房子安全情况下可以同过网站访问并查询巡逻状态。无需再浪费时间使用设备到计算机下载和处理,那样的操作已经落后。

如果使用脱机方式,我们可以取代旧的系统,通过电子邮件发送数据或从电脑上下载。但不同的是,数据有GPS为每个位置所做的记录,所以可以完全避免员工在时间和地点上作弊。

9703NFC可以申请多个应用程序,例如:

-资产离线跟踪:使用NFC标签贴纸,读取资产上的代码信息及GPS位置,并通过电子邮件发回反馈或使用电脑下载。

-离线/在线跟踪在外工作的销售人员或服务人员的工作时间,通过GPS的记录和员工的工作报告做比较,防止员工在时间上作弊。

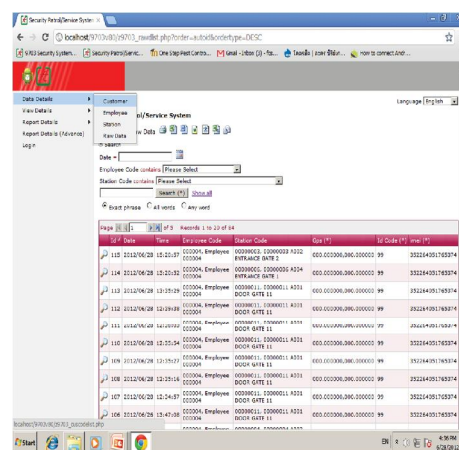

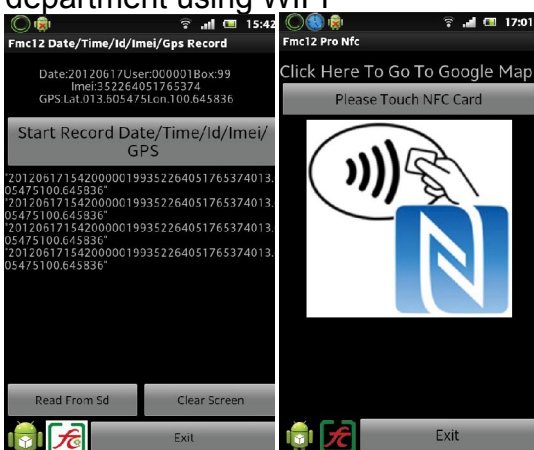

-离线/在线跟踪各业务部门在工作上所消耗的时间,例如汽车修理时候通过车间里的WIFI来记录在喷漆/引擎/空调各个部门所需要的时间。
